

Always run in a new thread

Used for network-based tasks with high I/O wait

Processes vs Coroutines

- ☐ **Processes are**
 - ☐ **Always run in a new thread**
 - ☐ **Used for local tasks with little IO wait**
- ☐ **Coroutines are**
 - ☐ **Part of the parent thread**
 - ☐ **Switch based on IO wait**
 - ☐ **Used for network-based or similar tasks with high IO wait**
