Swoole

☐ **Auto-manages the Coroutines and Processes**

☐ PHP code all available to all Coroutines and Processes

☐ **Standard memory separate - Data can be passed into coroutine, but must use swoole-provided classes to get data out or share it.**

Chan is great for Coroutines

Swoole

☐ **Auto-manages the Coroutines and Processes**

☐ **PHP code all available to all Coroutines and Processes**

☐ **Standard memory separate - Data can be passed into coroutine, but must use swoole-provided classes to get data out or share it.**

☐ **Chan is great for Coroutines**

☐ **Table is great for Processes**

Processes vs Coroutines
